Time and Location:

Tuesday February 25, 7:00-8:30 P.M., in 1005 Smith Lab

If you have a conflict and we have not set up an alternative time for you to take the exam, please let me know as soon as possible.

Review session:

Sunday Feb. 23, 3 P.M., in 2004 Evans Lab (Ellen)

Details:

The exam will cover the material in Chapters 2-4, focusing on the topics covered in lecture between Feb. 3 and Feb 21 and in problem sets 5, 6, and 7. While the exam is technically not cumulative, the material covered during the fifth week of classes (partial derivatives) provided another way to solve most of the types of problems discussed in the preceding five weeks.

This week, I plan to cover the rest of the material in Chapter 4, focusing on equilibrium and electrochemistry. I will be more specific on what parts of Chapter 4 will be in the exam in lecture on Friday.

The exam will be CLOSED BOOK, but I will provide you with a list of “useful equations.”
